

Citadel One

Your life. Your safety.

Weak link

Blockchain perfectly protects payments. And what about you?

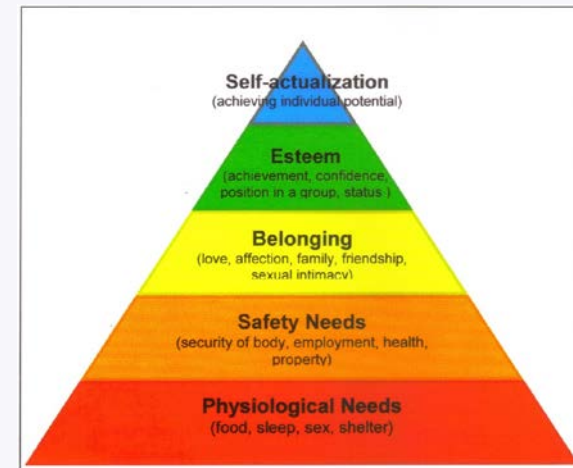

Where is the problem?

Blockchain payments cannot be “undone”. You can try to find bad guys but didn't get back your money.

Also many states forbid to citizens to have or buy Bitcoins. Cops there will do nothing (if do not do worse) So your safety is broken...

What we can to do?

Project

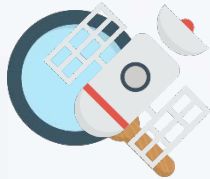

citadel one

Securing crypto currency in emergency situations

"Panic Button"

Search, negotiation, rescue

**My home is my castle.
"Dispersal field"**

**Residence permit / long-term
visa for the country of
"Dispersal field"**

Citadel's band

The basic element of your safety

Citadel's band

Object

Together with the other participants, you choose the place for the "citadel"

We search an object in this place, acquire it, assign the "keeper".

We initiate the procedure of residence permits for all participants

Moving to

We organize departure from the your host country, if it's necessary.

The “keeper” will meet you, help arrange a life in the country where the citadel is located

Membership = a token (own for each citadel), you can change it or sell to guys in your citadel's waitlist.

Plans and prices

2018

- Wallet
- Panic button

2019

- NFC payments
- QR-scanner

2018

- Personal hiring
- Citadel's creation

2019

First objects are ready to use

= 0.05 BTC

Services for the first year after the activation of the bracelet included

+

~ 5 BTC
